Gwynne's Latin Mar 14 2021 'Latin is "it", the most wonderful "thing". It is mind-enhancing, character-improving, enthralling, exciting, deeply satisfying, and valuable. My solid determination is to spare no pains to do it the justice that its importance demands.' Mr Gwynne, author of the Sunday Times bestselling phenomenon Gwynne's Grammar, is just as emphatic about the importance of Latin as he is about the importance of grammar. From the novice to the more well-versed, Gwynne's Latin is essential for anyone interested in learning Latin; Mr Gwynne promises to teach you more Latin in half an hour than you would learn from years of being taught Latin at school. He also includes a fascinating section on everyday Latin usage, which discusses all the Latin words and idioms we still use today, such as 'quid pro quo' and 'sui generis'. Though we need no further convincing - as we know, Mr Gwynne is never wrong - here are just some of the

many reasons why Latin is utterly wonderful: - Latin is an academic subject easy enough for the least intelligent of us to grasp all the basic elements of, and yet difficult enough to be demanding for its greatest scholars. - For well over a thousand years it was the means of communication that united the whole of Europe culturally and in every other significant way. - It is the direct ancestor of, between them, the five most widely-spoken European languages, and both of the official South American languages. - It is the ancestor and source of more than half of the English language, partly directly and partly through French, which for some centuries was England's official language.

Following in the same beautifully designed footsteps of Gwynne's Grammar, Gwynne's Latin will teach you all the fundamentals of Latin quickly, thoroughly and better than all the competition.

Young Children at School in the Inner City Jan 30 2020 First published in 1988, this work reports on a major British study of children's progress and behaviour in 33 infant schools. The research looks at children from nursery through to junior school and asks why some children had higher attainments and made more progress than others. Using observations not only in schools but also interviews with children and parents, the children's skills on entering school were found to have an important effect on progress. In each school, black and white children, and girls and boys were studied, in order gauge whether gender or ethnicity were related to progress.
