Thinking Like a Generalist Oct 20 2021 What can we teach kids today that will have utility ten or fifteen years from now? Angela Kohnen and Wendy Saul propose an approach to information literacy that goes beyond the teaching of discreet, easily outdated skills. Instead they use activity to help students build identities as curious individuals empowered to ask their own questions and able to navigate their information-filled world in pursuit of credible answers. A generalist is curious, open-minded, skeptical, and persistent in their quest for information. Thinking Like a Generalist demonstrates what it means to take a generalist stance in instruction and provides a set of teaching tools to be able to pass those skills to students--skills that will transfer beyond the walls of the classroom. Inside you'll find the following: a thorough introduction to what it means to be a "generalist", and how to develop the practices and tools that help generalists navigate the world we live in a focus on the teacher becoming a generalist and tips for modeling those practices in the classroom detailed instructions on how to write a unit of study that emphasizes generalist literacy skills and includes an overview and examples of five different units how to use the authors' read-aloud-think-aloud strategy to orient students to generalist tools and practices The ideas, strategies, and examples in Thinking Like a Generalist will give you the tools to think like a generalist and then pass that knowledge on to your students, guiding them to become inquisitive, lifelong learners and preparing them for a future that we can't yet imagine.

Educating Teachers of Science, Mathematics, and Technology Jan 29 2020 Each new headline about American students' poor performance in math and science leads to new calls for reform in teaching. Education Teachers of Science, Mathematics, and Technology puts the whole picture together by synthesizing what we know about the quality of math and science teaching, drawing conclusions about why teacher preparation needs reform, and then outlining recommendations for accomplishing the most important goals before us. As a framework for addressing the task, the book advocates partnerships among school districts, colleges, and universities, with contributions from scientists, mathematicians, teacher educators, and teachers. It then looks carefully at the status of the education reform movement and explores the motives for raising the bar for how well teachers teach and how well students learn. Also examined are important issues in teacher professionalism: what teachers should be taught about their subjects, the utility of in-service education, the challenge of program funding, and the merits of credentialing. Professional Development Schools are reviewed and vignettes presented that describe exemplary teacher development practices.

New Realities in Foreign Affairs Jul 05 2020 Moderne Diplomatie wirkt heute in viele Bereiche des modernen Lebens hinein. Sie ist zugleich selbst neuen Einflüssen ausgesetzt. Faktoren, die unsere Gesellschaften verändern, verändern auch unser Regierungshandeln, auch in der Außenpolitik, seien es Digitalisierung, emotionalisierte Sensibilitäten unserer Öffentlichkeiten oder nicht-staatliche internationale Akteure. Derartige Entwicklungen müssen von der Diplomatie aufgenommen werden, damit sie weiter als Instrument einer Regierung funktionieren kann. Regierungen sollten Wege finden, zwischen den neuen Bedürfnissen der Gesellschaft und den Notwendigkeiten legitimen Regierungshandelns zu vermitteln. Das Ziel sollte sein, als souveräner Staat handeln zu können und zugleich das Potential der tiefgreifenden gesellschaftlichen Veränderungen zu nutzen.
