**Longman Academic Writing Series** Jan 27 2022 Level 4 teaches high-intermediate students to write various genres of academic essays. The text's proven approach integrates training in grammar, mechanics, vocabulary, and essay organization along with the writing process.

**Evolutionary Computation** Feb 13 2021 This book presents several recent advances on Evolutionary Computation, specially evolution-based optimization methods and hybrid algorithms for several applications, from optimization and learning to pattern recognition and bioinformatics. This book also presents new algorithms based on several analogies and metafores, where one of them is based on philosophy, specifically on the philosophy of praxis and dialectics. In this book it is also presented interesting applications on bioinformatics, specially the use of particle swarms to discover gene expression patterns in DNA microarrays. Therefore, this book features representative work on the field of evolutionary computation and applied sciences. The intended audience is graduate, undergraduate, researchers, and anyone who wishes to become familiar with the latest research work on this field.

[Academic Discourse and Critical Consciousness](#) Jul 01 2022 This collection of essays traces the attempts of one writing teacher to understand theoretically - and to respond pedagogically - to what happens when students from diverse backgrounds learn to use language in college. Bizzell begins from the assumption that democratic education requires us to attempt to educate all students, including those whose social or ethnic backgrounds may have offered them little experience with academic discourse. Over the ten-year period chronicled in these essays, she has seen herself primarily as an advocate for such students, sometimes called "basic writers." Bizzell's views on education for "critical consciousness," widely discussed in the writing field, are represented in most of the essays in this volume. But in the last few chapters, and in the intellectual autobiography written as the introduction to the volume, she calls her previous work into question on the grounds that her self-appointment as an advocate for basic writers may have been presumptuous, and her hopes for the politically liberating effects of academic discourse misplaced. She concludes by calling for a theory of discourse that acknowledges the need to argue for values and pedagogy that can assist these arguments to proceed more inclusively than ever before. The essays in this volume constitute the main body of work in which Bizzell developed her influential and often cited ideas. Organized chronologically, they present a picture of how she has grappled with major issues in composition studies over the past decade. In the process, she sketches a trajectory for the development of composition studies as an academic discipline.

**Academic Interactions (No DVD)** Nov 05 2022 This version of the

book matches 9780472033324 except it is not packaged with a DVD. All references to the DVD in the text have been replaced with "videos." Video access sold separately. (Email [esladmin@umich.edu](mailto:esladmin@umich.edu) for access.) The ability to understand and be understood when communicating with professors and with native speakers is crucial to academic success. Academic Interactions focuses on actual academic speaking events, particularly classroom interactions and office hours, and gives students practice improving the ways that they communicate in a college/university setting. Academic Interactions addresses skills like using names and names of locations correctly on campus, giving directions, understanding instructors and their expectations, interacting during office hours, participating in class and in seminars, and delivering formal and informal presentations. In addition, advice is provided for communicating via email with professors and working in groups with native speakers (including negotiating tasks in groups). The text uses transcripts from MICASE (the Michigan Corpus of Academic Spoken English) to ensure that students learn the vocabulary and communication strategies that will be most effective in their academic pursuits. Units also feature language use issues like ellipsis, hedging, and apologies.

**Longman Academic Writing** May 31 2022 This five-level writing series, organised by rhetorical genres, develops student writing from composing sentences to writing research papers. A step-by-step approach guides students seamlessly through the writing process. Clear writing models and varied practice enable students to write effectively in different genres. Rigorous sentence structure, grammar, and mechanics development improves key writing skills. Peer Review and Writer's Self-Check hone revision and editing skills.

**Seen** Oct 24 2021 Cali may be out of the fire, but that doesn't mean the heat is off. Finn and Knox have been summoned to answer for their actions. The paparazzi and media are circling Kingston like vultures. People have questions, and they want answers. Tanner took pity on Cali, bringing Braxton, Bree, Knox, Finn, and Hoyt along for the ride; a decision they may regret. Fallout from the fire isn't Cali's only problem. Already victim to a prank war in her own dorm, Cali finds herself in the middle of the first year crew's saga. Can Cali remain Switzerland as the pranks continue to escalate, or will she be caught in the cross-hairs once again? Gruesome scalpel work. New societies. Minor kidnappings. Death by glare. Just a typical day at Wiltshire. Feeling guilty, homeless, and possessing only the clothes on her back, Cali tries to juggle the demanding Wiltshire academics, investigators who don't think Cali is as innocent as she seems, a game with increasing stakes that Cali doesn't know the rules to, and trying to hold on to the friends she's made. Cali wanted to be seen, but this is not what she had in mind.

[The Changing Academic Profession](#) Apr 29 2022 This book provides an overview on the major findings of a questionnaire survey of academic profession in international perspective. More than 25,000 professors and junior staff at universities and other institutions of higher education at almost 20 countries from all over the world provide information on their working situation, their views and activities. The study "The Changing Academic Profession" is the second major study of its kind, and changes of views and activities are presented through a comparison of the

findings with those of the earlier study undertaken in the early 1990s. Major themes are the academics' perception of their societal and institutional environments, the views on the major tasks of teaching, research and services, their professional preferences and actual activities, their career, their perceived influence and their overall job satisfaction. Emphasis is placed on the influence of recent changes in higher education: the internationalisation and globalisation, the increasing expectation to provide evidence of the relevance of academic work, and finally the growing power of management at higher education institutions. Overall, the academics surveyed show that worldwide discourses and trends in higher education put their mark on the academic profession, but differences by country continue to be noteworthy. Academics consider themselves to be more strongly exposed to mechanism of regulations, incentives and sanctions as well as various assessments than in the past; yet their own freedom, and responsibilities and influence shape their identity more strongly and are reflected in widespread professional satisfaction.

**Universities in the Knowledge Society** Dec 14 2020 This book explores the complex, multi-faceted relationships between national research and innovation systems and higher education. The transition towards knowledge societies/economies is repositioning the role of the university and transforming the academic profession. The volume provides a foundational introduction to the concepts of knowledge society and knowledge economy, and these concepts ground the detailed case studies of eighteen systems, located across five continents. Each case study was written by a leading expert in that jurisdiction, and provides a critical analysis of the research and development infrastructure, the role of universities, and the implications for the academic profession. The book describes how nations in various geographic regions and at various stages of economic maturity are restructuring their university systems to adapt to the new imperatives, and provides a cross-case analysis identifying common themes and distinctive features. In telling the story of higher education's on-going global metamorphosis, the contributing authors place current developments in the context of the university's historic evolution, survey the changing metrics that national governments are adopting to measure university performance, and describe a new international project, the Academic Profession in the Knowledge-based Society [APiKS] that involved a common survey of academics in more than twenty countries to take the pulse of developments "on the ground" while documenting the challenges confronting knowledge workers in the new economy.

**English for Academic Research: A Guide for Teachers** Aug 02 2022 Scientific English is possibly the most rewarding area of EFL teaching. It differs from English for Academic Purposes (EAP) as it is directed to a much smaller audience: PhD and postdoc students. Courses on Scientific English are held in universities throughout the world, yet there is very little support for teachers in understanding what to teach and how to teach it. This guide is part of the English for Academic Research series. Part 1 of the book sheds light on the world of academia, the writing of research papers, and the role of journal editors and reviewers. Part 2 gives practical suggestions on how to help your students improve their presentation skills. In Part 3 you will learn how to teach academic skills using nonacademic examples. Parts 1-3 are thus useful for anyone involved in teaching academic English, whether they have used the other books in the series or not. Part 4 suggests two syllabuses for teaching writing and presenting skills, based on the two core books: English for Writing Research Papers English for Presentations at International Conferences This book will help you i) understand the world of your students (i.e. academic research), ii) plan courses, and iii) exploit the What's the Buzz? sections in the books on Writing, Presentations, Correspondence and Interacting on Campus. Adrian Wallwork has

written over 30 books covering General English (Cambridge University Press, Scholastic), Business English (Oxford University Press), and Scientific English (Springer). He has trained several thousand PhD students from all over the world to write and present their research. Adrian also runs a scientific editing service: English for Academics (E4AC).

**Malaysia's 14th General Election and UMNO's Fall** Sep 30 2019 The 2018 Malaysian General Election will stand as a major defining event in Malaysian history, when the ruling Barisan Nasional coalition unexpectedly lost power in the country they had ruled for over half a century. This volume brings together scholars who assess one fundamental factor that brought about this game-changing event in Malaysian politics: intra-elite feuding in the leading Malay-based political parties. This study provides an analysis of individual state politics as well as national trends shaped by the actions of leaders in government and the opposition. An indispensable guide for scholars studying the politics of Malaysia and of Southeast Asia more broadly, it will be of great interest for all readers with an interest in Malaysian politics.

**RESTful API Design** Nov 24 2021 Looking for Best Practices for RESTful APIs? This book is for you! Why? Because this book is packed with practical experience on what works best for RESTful API Design. You want to design APIs like a Pro? Use API description languages to both design APIs and develop APIs efficiently. The book introduces the two most common API description languages RAML, OpenAPI, and Swagger. Your company cares about its customers? Learn API product management with a customer-centric design and development approach for APIs. Learn how to manage APIs as a product and how to follow an API-first approach. Build APIs your customers love! You want to manage the complete API lifecycle? An API development methodology is proposed to guide you through the lifecycle: API inception, API design, API development, API publication, API evolution, and maintenance. You want to build APIs right? This book shows best practices for REST design, such as the correct use of resources, URIs, representations, content types, data formats, parameters, HTTP status codes, and HTTP methods. Your APIs connect to legacy systems? The book shows best practices for connecting APIs to existing backend systems. Your APIs connect to a mesh of microservices? The book shows the principles for designing APIs for scalable, autonomous microservices. You expect lots of traffic on your API? The book shows you how to achieve high performance, availability and maintainability. You want to build APIs that last for decades? We study API versioning, API evolution, backward- and forward-compatibility and show API design patterns for versioning. The API-University Series is a modular series of books on API-related topics. Each book focuses on a particular API topic, so you can select the topics within APIs, which are relevant for you.

**Learning Through Academic Choice** Aug 22 2021 Provides information on using Academic Choice to increase students' motivation and academic skills.

**Complete Academic Language Mastery Series** Oct 12 2020 Your ELLs' and SELs' bridge to more rigorous content "This series will be a valuable resource for all teachers of EL and SEL learners." --PAULINE GIBBONS, Author of Scaffolding Language, Scaffolding Learning By now it's a given: if we're to help our ELLs and SELs access the rigorous demands of today's content standards, we must explicitly teach the "code" that drives school success: academic language. Look no further for assistance than this much-anticipated series from Ivannia Soto, in which she invites field authorities to share every teacher's need-to-know strategies on the four essential components of academic language: Jeff Zwiers on conversational discourse in context David and Yvonne Freeman on grammar and syntax in context Margarita Calderon on vocabulary in context Noma LeMoine on culture in context. Select the book that best matches your immediate needs; each one is designed to stand alone. Better yet, read all four volumes as your start-to-finish instructional plan for closing the achievement gap once and for all.

**Academic Conversations** Jun 19 2021 Where would we be without conversation? Throughout history, conversations have allowed us to see different perspectives, build ideas, and solve problems. Conversations, particularly those referred to in this book as academic conversations, push students to think and learn in lasting ways. Academic conversations are back-and-forth dialogues in which students focus on a topic and explore it by building, challenging, and negotiating relevant ideas. Unfortunately, academic conversations are rare in many classrooms. Talk is often dominated by the teacher and a few students, or it does not advance beyond short responses to the teacher's questions. Even certain teaching approaches and curriculum programs neglect to train students

how to maintain a focused, respectful, and thoughtful conversation. To address these challenges, authors Jeff Zwiers and Marie Crawford have identified five core communication skills to help students hold productive academic conversations across content areas. These skills include: elaborating and clarifying, supporting ideas with evidence, building on and/or challenging ideas, paraphrasing, and synthesizing. This book shows teachers how to weave the cultivation of academic conversation skills and conversations into current teaching approaches. More specifically, it describes how to use conversations to build the following: Academic vocabulary and grammar Critical thinking skills such as persuasion, interpretation, consideration of multiple perspectives, evaluation, and application Literacy skills such as questioning, predicting, connecting to prior knowledge, and summarizing Complex and abstract essential understandings in content areas such as adaptation, human nature, bias, conservation of mass, energy, gravity, irony, democracy, greed, and more An academic classroom environment brimming with respect for others' ideas, equity of voice, engagement, and mutual support The ideas in this book stem from many hours of classroom practice, research, and video analysis across grade levels and content areas. Readers will find numerous practical activities for working on each conversation skill, crafting conversation-worthy tasks, and using conversations to teach and assess. Academic Conversations offers an in-depth approach to helping students develop into the future parents, teachers, and leaders who will collaborate to build a better world.

Whose Monet? Dec 26 2021 This extraordinary paperback provides a highly accessible and appealing orientation to the American legal system and presents basic concepts of civil litigation to first-year law students. *Whose Monet? An Introduction to the American Legal System* focuses on a lengthy dispute over the ownership of a painting as a vehicle for introducing students to the basic law school tasks of reading analytically, understanding legal materials, and working with the common law. The author and his colleagues have used these materials successfully in their classrooms for many years, ensuring their teachability and effectiveness: *Whose Monet?* can be used as primary course material in orientation courses or seminars, as well as collateral reading for in-semester Legal Process or Civil Procedure courses The organization is logical and straightforward and the accessible writing style--lucid, descriptive, and conversational--is ideal for incoming students The major events in a lawsuit are considered, and the text sheds light on how the law is applied in a civil dispute, introducing common law and statutory law and the various courts and their interrelationship (trial/appellate, state/federal) The author draws on judicial opinions, litigation papers, transcripts, and selections from commentators and various jurisprudential sources, thereby exposing the first-year student to as broad a spectrum of materials as possible Telling the story of a real lawsuit (*DeWeerth v. Baldinger*)--from client intake through trial and various appeals--draws students into the legal process by means of an engaging narrative and makes for a truly enjoying teaching experience for professors The lawyer's role is examined in both its functional and moral dimensions: What do lawyers do? What does society legitimately expect lawyers to do? This book is suitable for both classroom and stand-alone assigned reading

**Reading Skills for College** Apr 05 2020 The Longman Academic Reading Series is a five-level series that prepares English language learners for academic work. The aim of the series is to make students more effective and confident readers by providing high-interest readings on academic subjects and by teaching them skills and strategies for effective reading, vocabulary building, note-taking, and critical thinking. The series also encourages students to discuss and write about the ideas they discovered in the readings, making them better speakers and writers of English as well. Features Readings based on academic sources -- Every reading in the text focuses on an academic subject and is chosen with the intent of providing different and intriguing perspectives on the theme. Multiple reading genres -- Readings come from a variety of sources or genres, from textbooks to on-line articles, and are written by a variety of experts from widely different fields. Explicit academic skills -- From critical reading to vocabulary building, notetaking and critical

thinking, the Longman Academic Reading Series provides students with a holistic approach to effective reading. Corpus-Informed approach to vocabulary (AWL) -- Students build vocabulary and acquire skills that will help them become more confident and successful in preparing for their academic work.

**Chasing Sedona** Jun 07 2020 Sedona Madison arrived at St. Augustine University five years after a tragic accident that changed the course of her life. Sedona had sworn to her parents she would never return to St. Augustine, but when she discovers the one man who might have the answers to her past calls St. Augustine his home, she abandons every promise in search of answers. If they wouldn't tell her the truth, she was going to find it herself, even if that meant losing their support along the way. As she gets closer to unraveling the secrets of her past, Sedona finds herself falling for the seductive, insufferable man she met her first night in town. Eagle, a man who is harboring secrets of his own is unwilling to revisit the past. He created a life separate from the one he claimed five years prior and no amount of love could convince him otherwise. Despite his head telling him to run, Eagle's heart rebels - leading him on a chase towards the brown-eyed beauty who will inevitably rip his heart out when she discovers the harrowing secret he has been hiding. As Sedona pushes to find the answers she so desperately needs, Eagle fights to keep his secrets buried deep. She was an unexpected, complicated disaster; she was everything he didn't know he needed.

**Women Rapping Revolution** Jan 15 2021 Detroit, Michigan, has long been recognized as a center of musical innovation and social change. Rebekah Farrugia and Kellie D. Hay draw on seven years of fieldwork to illuminate the important role that women have played in mobilizing a grassroots response to political and social pressures at the heart of Detroit's ongoing renewal and development project. Focusing on the Foundation, a women-centered hip hop collective, *Women Rapping Revolution* argues that the hip hop underground is a crucial site where Black women shape subjectivity and claim self-care as a principle of community organizing. Through interviews and sustained critical engagement with artists and activists, this study also articulates the substantial role of cultural production in social, racial, and economic justice efforts.

**API Architecture** Jun 27 2019 Looking for the big picture of building APIs? This book is for you! Building APIs that consumers love should certainly be the goal of any API initiative. However, it is easier said than done. It requires getting the architecture for your APIs right. This book equips you with both foundations and best practices for API architecture. This book is for you if you want to understand the big picture of API design and development, you want to define an API architecture, establish a platform for APIs or simply want to build APIs your consumers love. This book is NOT for you, if you are looking for a step-by-step guide for building APIs, focusing on every detail of the correct application of REST principles. In this case I recommend the book "API Design" of the API-University Series. What is API architecture? Architecture spans the bigger picture of APIs and can be seen from several perspectives: API architecture may refer to the architecture of the complete solution consisting not only of the API itself, but also of an API client such as a mobile app and several other components. API solution architecture explains the components and their relations within the software solution. API architecture may refer to the technical architecture of the API platform. When building, running and exposing not only one, but several APIs, it becomes clear that certain building blocks of the API, runtime functionality and management functionality for the API need to be used over and over again. An API platform provides an infrastructure for developing, running and managing APIs. API architecture may refer to the architecture of the API portfolio. The API portfolio contains all APIs of the enterprise and needs to be managed like a product. API portfolio architecture analyzes the functionality of the API and organizes, manages and reuses the APIs. API architecture may refer to the design decisions for a particular API proxy. To document the design decisions, API description languages are used. We explain the use

of API description languages (RAML and Swagger) on many examples. This book covers all of the above perspectives on API architecture. However, to become useful, the architecture needs to be put into practice. This is why this book covers an API methodology for design and development. An API methodology provides practical guidelines for putting API architecture into practice. It explains how to develop an API architecture into an API that consumers love. A lot of the information on APIs is available on the web. Most of it is published by vendors of API products. I am always a bit suspicious of technical information pushed by product vendors. This book is different. In this book, a product-independent view on API architecture is presented. The API-University Series is a modular series of books on API-related topics. Each book focuses on a particular API topic, so you can select the topics within APIs, which are relevant for you.

**Success in Academic Surgery: Basic Science** Mar 29 2022 Academic surgeons play an essential role in advancing the field and improving the care of patients with surgical disease. As the Association for Academic Surgery (AAS) Fall Courses ([www.aasurg.org](http://www.aasurg.org)) and international courses continue to evolve to address the rapidly expanding scope and complexity of academic surgery, there is a greater need for an accompanying textbook to supplement the material presented in the courses. *Success in Academic Surgery: Basic Science* is a unique and portable handbook that focuses on the basic and translational research. It includes new educational materials that are necessary to address not only the rapid evolution and rise of novel research methodologies in basic science and translational research, but also the changing environment for academic surgeons. *Success in Academic Surgery: Basic Science* is a valuable text for medical students, surgical residents, junior faculty and others considering a career in surgical research. *Washington University Record* Apr 17 2021
