Academic Writing Genres: Essays, Reports & Other Genres Jan 30 2020 Overview of EAP Foundation: Academic Writing Genres Students at university are expected to write in a range of forms, from essays to reports and other genres. EAP Foundation: Academic Writing Genres, part of the EAP Foundation series of books, examines frequently encountered forms of academic writing, identifying common features such as structure and language, and providing clear models, in order to scaffold learning and provide a way for students to master each one. Contents of the book The first section of the book looks in detail at essay writing, the most common genre for academic study. It begins by looking at the content and structure of a typical essay, then looks at different essay types, namely comparison and contrast, cause and effect, problem-solution, classification, argument, discussion, definition, process, exemplification, and description. The second section of the book looks at report writing, the next most common genre for academic study, beginning with an overview of report writing, followed by a detailed look at the two most common report types,

namely laboratory reports and business reports. Other report types are also covered. The third section covers other genres which do not fit into the essay or report category. They are posters, reflective writing, book reviews, research proposals, and theses/dissertations. The fourth and final section considers genre elements. These are types of writing which can form part of other genres, but can also be stand-alone pieces of writing, and need looking at in detail. They are abstracts and literature reviews. About the EAP Foundation series The EAP Foundation series of books is written for students who are preparing for, or currently studying at, a Western university, including those on foundation or pre-session courses. The units focus on presenting practical information in a straightforward and readable manner. There are additional tips in each unit to help students perform well, and numerous 'In short' boxes which give a summary of the main points, for quick previewing and reviewing of the unit. Each unit contains a checklist, which can be used to give feedback on writing (self or peer). Each unit concludes with a range of exercises to check comprehension and deepen understanding. Full answers to exercises are provided at the end of the book. All books in the series come with free additional online resources, accessed via the code given in the Appendices. In short Whatever your course of study, this book will provide an indispensable guide to all forms of writing you will encounter.

United University Professions Oct 28 2019 Tells the story of the nation's largest higher education union from its earliest years to its role today as a powerful organization promoting the interests of faculty, staff, and the entire SUNY community. Public education, from pre-K through higher education, and labor unions, particularly those representing public sector workers, are today under attack from those who question the very need to have such basic institutions. United University Professions is a history of United University Professions (UUP), which grew from humble beginnings to become the nation's largest higher education union, representing some 35,000 academic and professional staff within the State University of New York (SUNY) system. Nuala McGann Drescher, William E. Scheuerman, and Ivan D. Steen chronicle how UUP built upon its early accomplishments at the bargaining table and in the political arena to become a national leader in the struggle to preserve academic freedom and the institution of tenure, the bedrock of academic freedom. More broadly, they argue, UUP in microcosm confirms the importance of unionization not only for the members it represents, but to core American values and American democracy itself. "This is a major contribution to our understanding of unions." — Stan Luger, author of *Corporate Power, American Democracy, and the Automobile Industry* "This book should interest, and be required reading for, anyone concerned about public higher education in the United States." — Brian Waddell, coauthor of *What American Government Does*

Inventing Academic Freedom Sep 07 2020 In 1968, there was political ferment everywhere. In Paris, students were in the streets. In the U.S., civil rights, the Vietnam War, and protests against the draft brought out millions. In this atmosphere, a young Jewish-American professor in the quiet town of Fredericton, New Brunswick sparked a controversy that established the principles of academic freedom on Canadian campuses. Norman Strax was an unlikely figure in a conservative town with a sleepy university campus. He didn't dress like other faculty members, he drove a funny car, and he didn't socialize much with his colleagues. The university president, Colin Mackay, was a

young scion of the local establishment who ran the university as if it belonged to him. With his links to Lord Beaverbrook, the Irvings, and the provincial government, he was confident of support for his paternalistic way of doing things. When Strax and some students protested a new library regulation, Colin Mackay abruptly suspended Strax from his teaching position. A sit-in followed, and the university dragged Strax into court. Before long, the provincial government and the judiciary were involved. So were university professors across Canada. In the end, the Strax Affair was the catalyst for a new approach to governance at Canadian universities and was key to establishing the principles of academic freedom.

Race and Arab Americans Before and After 9/11 Dec 11 2020 Bringing the rich terrain of Arab American histories to bear on conceptualizations of race in the United States, this groundbreaking volume fills a critical gap in the field of U.S. racial and ethnic studies. The articles collected here highlight emergent discourses on the distinct ways that race matters to the study of Arab American histories and experiences and asks essential questions. What is the relationship between U.S. imperialism in Arab homelands and anti-Arab racism in the United States? In what ways have the axes of nation, religion, class, and gender intersected with Arab American racial formations? What is the significance of whiteness studies to Arab American studies? Transcending multiculturalist discourses that have simply added on the category "Arab-American" to the landscape of U.S. racial and ethnic studies after the attacks of September 11, 2001, this volume locates September 11 as a turning point, rather than as a beginning, in Arab Americans'

Nothing But Wild Jun 04 2020 Dallas Van Zant...Water polo god.Shameless flirt.Beautiful disaster in the most literal sense of that label. Trust me, it's not hyperbole. He's in big trouble with the law. What does this have to do with me, you ask? Unfortunately, a lot.For some reason, which I still can't quite wrap my brain around, I've been talked into driving him around as part of his plea deal. Problem is, he makes me nervous. I'm not good with people, men in particular, popular athletes especially. I've worked really hard to get my disability under control and one minute in his company and all my hard work flies out the window.To top it all off, I promised myself that I was going to make some serious changes this year. I'm tired of feeling awkward around boys. I'm tired of never having had a boyfriend. I'm tired of being lonely. But I'm also not the type to turn away a person in need. So I'll do what I must to help him out. I'll just pretend that I'm not enjoying his company. And I'll ignore the fact that he's sweet and funny. And I'll tell myself every day that he's out of my league.Because I'm as inexperienced as they come...and Dallas Van Zant is nothing but wild.

Strategic Education Research Partnership Aug 07 2020 Envision a cadre of leading scientists and practitioners working collaboratively on a highly focused program of education research that is tightly coupled with practice. Much of the research is carried out in school settings. Research influences educational practice, and the outcomes in practice inform further research efforts. The Strategic Education Research Partnership (SERP) is designed to make this vision a reality. It proposes a large-scale, coherent program of research and development that would put the problems of educational practice at its center, and focus on all stages necessary to influence practice. These include theory testing, the development and evaluation of instructional programs, the study of practice in context, and attention to taking innovations to scale. This book explains the features of SERP and the ways in which it would address the major challenges of linking research and practice. It is a call to mobilize the nation's resources and political will, the power of scientific research, and the expertise of our educators, to create a more effective research and

development program for improving student learning.

William Terry Couch and the Politics of Academic Publishing Sep 19 2021 William Terry Couch (1901-1988) began his four-decade publishing career building the University of North Carolina Press into one of the nation's leading university presses. His editorial attacks on the social ills of the South earned him a reputation as a southern liberal. By the 1940s, his disaffection with New Deal politics turned him toward the right, resulting in his 1950 firing as director of the University of Chicago Press. As a conservative, Couch sought books and articles that would sway general readers from what he saw as an intellectual torpor that accepted the growing role of government in American life. The liberals who controlled the presses found him dogmatic and irascible. When he tried to turn Collier's Encyclopedia into a journal of conservative opinion, he was fired as editor in chief in 1959. He ended his career as publisher for the libertarian William Volker Fund, which collapsed in the 1960s under charges of Nazism. Couch was committed to publishing as a social cause and strove to disturb American complacency. This is the first book-length biography of Couch--a publisher who brought academic scholarship to the reading public to effect social, political and economic change.
