**Buyology** May 27 2022 NEW YORK TIMES BESTSELLER • "A fascinating look at how consumers perceive logos, ads, commercials, brands, and products."—Time How much do we know about why we buy? What truly influences our decisions in today's message-cluttered world? In *Buyology*, Martin Lindstrom presents the astonishing findings from his groundbreaking three-year, seven-million-dollar neuromarketing study—a cutting-edge experiment that peered inside the brains of 2,000 volunteers from all around the world as they encountered various ads, logos, commercials, brands, and products. His startling results shatter much of what we have long believed about what captures our interest—and drives us to buy. Among the questions he explores: • Does sex actually sell? • Does subliminal advertising still surround us? • Can "cool" brands trigger our mating instincts? • Can our other senses—smell, touch, and sound—be aroused when we see a product? *Buyology* is a fascinating and shocking journey into the mind of today's consumer that will captivate anyone who's been seduced—or turned off—by marketers' relentless attempts to win our loyalty, our money, and our minds.

**Struggle for Justice** Apr 13 2021 The work consists of translation of speeches & conversations from the

originals in Punjabi. The popular leader of a Sikh religious revival, Sant Bhindranwale is perhaps one of the most misrepresented figures in recent history. He spoke only Punjabi & authentic material in English has been virtually non-existent. During the religious oppression that followed his death in the 1948 Indian army attack, people hurried to destroy relevant records to avoid persecution. Through this culmination of fifteen years of painstaking research the author has given us a rare opportunity to meet & understand this man through his own words. Also included is an introductory essay describing the Sant's mission & martyrdom. This publication stimulates some provocative questions. Many people in the media & academia, who expect transparency from the state agencies & hold them accountable for their words & deeds, might have to undertake a probing self-analysis. They might ask themselves, where were they when the official media blitz of misinformation completely distorted the truth? The author is Professor Emeritus at The Ohio State University.

Fusion Physics Feb 09 2021 This publication is a comprehensive reference book for graduate students and an invaluable guide for more experienced researchers. It provides an introduction to nuclear fusion and its status and prospects, and features specialised chapters written by leaders in the field, presenting the main research and development concepts in fusion physics. It starts with an introduction to the case for the development of fusion as an energy source. Magnetic and inertial confinement are addressed. Dedicated chapters focus on the physics of confinement, the equilibrium and stability of tokamaks, diagnostics, heating and current drive by neutral beam and radiofrequency waves, and plasma-wall interactions. While the tokamak is a leading concept for the realisation of fusion, other concepts (helical confinement and, in a broader sense, other magnetic and inertial configurations) are also addressed in the book. At over 1100 pages, this publication provides an unparalleled resource for fusion physicists and engineers.

Green Boating Jul 05 2020 The coastal and archipelago areas in the Baltic Sea are popular destinations for a number of tourists. An important group of tourists is boaters, who visit the coastal areas during a short summer period. Boat owners are sometimes pictured as having a great interest for the nature and a willingness to do right. Pollution from pleasure boats such as discharges of oil and fuel, antifouling paints and cleaning agents have a negative impact on the coastal environment. Environmentally sound alternatives exist to some extent, but are not very common. Sustainable alternatives for boaters are lacking behind. One of the underlying purposes of this study was to understand how we can help boat owners change their behaviour and decrease the negative impact on the marine environment. The survey among boaters has been conducted in Finland, Sweden and Denmark with a web based survey ordered by the Keep Sweden Tidy Foundation together with Keep the Archipelago Tidy Association in Finland and the Danish Outdoor Council. The research was performed by SIFO Research International.

**The Lobster Chronicles** Dec 30 2019 Declared a triumph by the New York Times Book Review, Linda Greenlaw's first book, The Hungry Ocean, appeared on nearly every major bestseller list in the country. Now, taking a break from the swordfishing career that earned her a major role in The Perfect Storm, Greenlaw returns to Isle au Haut, a tiny Maine island with a population of 70 year-round residents, 30 of whom are Greenlaw's relatives. With a Clancy-esque talent for fascinating technical detail and a Keillor-esque eye for the drama of small-town life, Greenlaw offers her take on everything from rediscovering home, love, and family to island characters and the best way to cook and serve a lobster. But Greenlaw also explores the islands darker side, including a tragic boating accident and a century-old conflict with a neighboring community. Throughout, Greenlaw maintains the straight-shooting, funny, and slightly scrappy style that has won her so many fans, and proves once again that fishermen are still the best storytellers around.

**Regime Change and Ethnic Politics in Indonesia** Jul 29 2022 When the Indonesian New Order regime fell in 1998, regional politics with strong ethnic content emerged across the country. In West Kalimantan the predominant feature was particularly that of the Dayaks. This surge, however, was not unprecedented. After centuries of occupying a subordinate place in the political and social hierarchy under the nominal rule of the Malay sultanates, Dayaks became involved in an enthusiastic political emancipation movement from 1945. The Dayaks secured the governorship as well as the majority of the regional executive head positions before they were shunned by the New Order regime. This book examines the development of Dayak politics in West Kalimantan from the colonial times until the first decade of the 21st century.

**Marine Diesel Engines** Nov 20 2021 Nigel Calder, a diesel mechanic for more than 25 years, is also a boatbuilder, cabinetmaker, and machinist. He and his wife built their own cruising sailboat, Nada, a project they completed in 1984. Calder is author of numerous articles for Yachting Monthly and many other magazines worldwide, as well as the bestselling Boatowner's Practical and Technical Cruising Manual and Boatowner's Mechanical and Electrical Manual, both published by Adlard Coles Nautical. Here, in this goldmine of a book, is everything the reader needs to keep their diesel engine running cleanly and efficiently. It explains how diesel engines work, defines new terms, and lifts the veil of mystery that surrounds such engines. Clear and logical, this extensively illustrated guide will enable the reader to be their own diesel mechanic. As Nigel Calder says: 'there is no reason for a boatowner not to have a troublefree relationship with a diesel engine. All one needs is to set the engine up correctly in the first place, to pay attention to routine maintenance, to have the knowledge to spot early warning signs of impending trouble, and to have the ability to correct small ones before they become large ones.'
