Text page references are provided. A complete answer key is provided in the Instructor's Manual.

**Virtual Clinical Excursions 2. 0 to Accompany Introduction to Medical-Surgical Nursing** Aug 06 2020 Virtual Clinical Excursions (Phase 2) is a workbook/CD-ROM package that guides the student through a multi-floor virtual hospital in a hands-on learning experience. The student is actively engaged with the workbook, CD-ROM and parent text throughout each lesson. Each lesson has a core textbook reading assignment and activities based on "visiting" the patients in the hospital. The lessons in the workbook complement the content in the textbook and provide a perfect environment in which students may "practice" what they are learning in the text. The multi-floor virtual hospital also has built-in testing of clinical knowledge with NCLEX type questions. As the student "visits" each patient, they are able to access realistic information resources essential for patient care. Information resources include: charts, medical administration records, electronic patient records, video streaming of patient dialogue with nurses and other related materials. These resources provide an opportunity for the student to assess and analyze information, make a diagnosis, set priorities and implement and evaluate care. Includes a guided tutorial which shows students how to work with a patient in the virtual hospital · collect patient data from various sources (reports, charts, medication administration record, short video clips and audio clips of nurse-patient interactions) · record patient data · listen to a report and itemize a patient's problems and high-priority concerns · and sometimes administer medications. Requires students to use their critical thinking skills to set priorities for care, collect data, analyze and interpret data, and reach conclusions about complex problems within a health-illness transition. Encourages active learning and provides opportunities to identify information to collect and process data for evidence-based patient care; work with data entry and retrieval screens; optimize use of available information resources; understand hospital information systems; manage information for decision-making; and maintain and improve core computing skills. Produced in conjunction with the Virtual Clinical Excursions CD-ROM authors: Jay Shiro Tashiro, PhD, RN, Director of Systems Design, Wolfson Informatics, Tucson, Arizona; Ellen Sullins, PhD, Director of Research, Wolfson Informatics, Tucson, Arizona; Gina Long, RN, DNSc, Assistant Professor, Department of Nursing, College of Health Professions, Northern Arizona University, Flagstaff, Arizona Virtual Clinical Excursions is a hybrid CD so it runs on both Macintosh and Windows platforms.

Study Guide to Accompany Psychiatric Nursing Jun 03 2020 This study guide offers dozens of self-study exercises, puzzles, and review questions.

**Nursing Research** Dec 30 2019 The Sixth Edition of this classic text maintains its place as the "Gold Standard" of nursing research. Nationally and internationally known, respected and used, the text provides readers with the skills they need to design and implement a research investigation and critically evaluate published research reports. Now completely revised and updated to reflect the latest trends in quantitative and qualitative research, this essential guide offers a focused, "how-to" approach. New in this edition: expanded discussion of qualitative approaches; demonstration of qualitative and quantitative approaches working together; charts and tables offer description of qualitative approaches; stronger emphasis on the "hands-on, how-to" methodology; more in-depth examination of research difference; research more powerful research utilization.

Virtual Clinical Excursions 2. 0 to Accompany Wong's Essentials of Pediatric Nursing Oct 08 2020 CD-ROM guides you through a multi-floor virtual hospital to provide you with a hands-on learning experience. You'll meet a series of pediatric patients at Canyon View Regional Medical Center. Each patient has their own diverse health problems, medical histories, families, cultural backgrounds, and personalities.

Virtual Clinical Excursions 3. 0 to Accompany Medical Surgical Nursing Dec 22 2021 Completely updated for easier use and more control, VCE Pacific View is a groundbreaking workbook/CD-ROM package that brings learning to life in a "virtual" hospital setting. This guided learning experience features textbook reading assignments that correspond with the CD-ROM and workbook activities. The workbook acts as a map, guiding students through the CD-ROM as they care for patients in the virtual hospital to help students make connections between what they experience through the CD-ROM and what they've learned in their textbook. Each virtual hospital visit allows the student to access realistic information resources essential to patient care resulting in a true-to-life, hands-on learning experience. Users will also discover that this edition of VCE is easier to use with the inclusion of flash-based technology and the elimination of previously needed third-party plug-ins. Meaningful, real-world problems place users in nursing scenarios where they can set priorities for care, collect data, analyze and interpret data, and reach conclusions about complex problems within a health-illness transition. The highly-engaging format encourages active learning and provides opportunities to identify information to collect and process data for evidence-based patient care; work with data entry and retrieval screens; optimize use of available information resources; understand hospital information systems; manage information for decision-making; and maintain and improve core computing skills. Lessons in the workbook complement the content in the textbook and guide the student through the virtual hospital. Includes NCLEX examination-style questions that offer built-in testing of clinical knowledge. The CD-ROM offers users the opportunity to visit each patient and access realistic information essential for patient care, including: charts, medical administration records, electronic patient records, video clips of nurse-client interactions, and other related materials. A clock icon appears under each lesson, estimating how much time it will take to complete. A linkage icon alerts the user whenever they are about to begin an exercise that connects with previous lessons. The elimination of third-party plug-ins facilitates fast and easy software installation. Flash-based technology allows for more ease of use and seamless navigation. Greater faculty support with the addition of the FAC PAC, an expanded instructors' website, and a radically expanded testing component. A medication administration feature enables users to select, prepare, and administer medications. Over 50 common medication errors imbedded within the software to boost clinical realism and prepare students for current practice. A Medication Room that contains a wide variety of drug storage areas, such as a Unit Dosage Cabinet, Automated Dispensing System, IV Storage, and a Refrigerator. 6 unique patients/cases, each with complex medical-surgical conditions for students to care for and monitor within the virtual hospital.

Study Guide to Accompany Medical Surgical Nursing Apr 13 2021 This comprehensive study aid provides a thorough understanding of the content in Phipps: Medical-Surgical Nursing, 7th Edition. Each chapter presents multiple, varied learning exercises that promote critical thinking, encourage students to think about the solutions they choose, and consider both possible benefits and consequences to the patient. Exercises include case studies, patient scenarios, analogies, compare and contrast, and inquiry. Provides learning exercises throughout to test content knowledge and promote critical thinking. Incorporates Critical Thinking Case Studies to encourage students to think about the solutions they choose and consider benefits and consequences to the patient. Critical Thinking Questions build in complexity as the student works through each case study. Includes a thorough answer key. Students are advised that answers may vary and are designed to stimulate discussion.

Workbook to Accompany Lippincott's Textbook for Nursing Assistants Aug 30 2022 This comprehensive full-color student workbook contains worksheets for each chapter of Lippincott's Textbook for Nursing Assistants, Second Edition. The worksheets are fully integrated with the text and offer exercises, questions, and learning activities for students.

Virtual Clinical Excursions 2. 0 to Accompany Fundamentals of Nursing Nov 08 2020 A multi-floor, virtual hospital, VCE 2.0: Canyon View Regional Medical Center contains 14 patient rooms with five floors - a Well Child Clinic, a Pediatrics Floor, a Surgery Department, an Intensive Care Unit, and

a Medical-Surgical Telemetry Floor. These patients are included in VCE 2.0: Canyon View Regional Medical Center: · Darlene Martin Ms. Martin, age 49, was admitted with uterine leiomyomata, irregular periods, and endometrial hyperplasia. She opts for a total abdominal hysterectomy. · James Franklin Mr. Franklin, age 67, admitted after experiencing episodic light-headedness, left arm and left leg numbness, and one episode of expressive aphasia. He undergoes a carotid endarterectomy. · James Story Mr. Story, age 42, has renal failure and Type 1 Diabetes Mellitus. He arrives complaining of significant weakness, nausea, and an increasingly edematous right arm. · Paul Jungerson Mr. Jungerson, age 61, complains of persistent left lower quadrant abdominal pain that has lasted for 3 days. Diagnosed with a coloanal anastomosis disruption, he undergoes a colostomy. · Elizabeth Washington Ms. Washington, age 63, is admitted following an automobile accident which fractures her hip. · Tom Handy Mr. Handy, age 62, is admitted for a right upper lobectomy with bronchoscopy for moderately differentiated squamous cell carcinoma of the right lung. · Julia Parker Ms. Parker, age 55, is admitted with indigestion and mid back pain. She suffers a myocardial infarction. Includes a guided tutorial which shows students how to work with a patient in the virtual hospital · collect patient data from various sources (reports, charts, medication administration record, short video clips and audio clips of nurse-patient interactions) · record patient data · listen to a report and itemize a patient's problems and high-priority concerns · and sometimes administer medications. Requires students to use their critical thinking skills to set priorities for care, collect data, analyze and interpret data, and reach conclusions about complex problems within a health-illness transition. Encourages active learning and provides opportunities to identify information to collect and process data for evidence-based patient care; work with data entry and retrieval screens; optimize use of available information resources; understand hospital information systems; manage information for decision-making; and maintain and improve core computing skills. A new clock icon appears under each lesson, offering an estimate on how much time it will take to complete. A new linkage icon alerts users whenever they are about to begin an exercise that connects with previous lessons. A new Table of Contents-Index matches the chapters from the textbook with patients and lessons in the workbook. A series of groundbreaking, new workbooks and CD-ROMs, Virtual Clinical Excursions bring learning to life in two different "virtual" hospital settings! Each lesson in Virtual Clinical Excursions has a core textbook reading assignment with corresponding CD-ROM and workbook activities. The exercises in the workbook complement the content in the the parent text and provide a perfect environment in which students may "practice" what they are learning in the text. The workbooks act as maps - guiding students through the CD-ROM as they care for patients in the virtual hospital. Virtual hospital visits on the CD-ROM allow students to access realistic information resources that are essential to patient care.

*Study Guide to Accompany Nursing Research* Jan 23 2022 This study guide accompanies Nursing Research, 7th edition - a comprehensive nursing research textbook which continues the expansion of coverage on qualitative research, including important issues for specific qualitative traditions such as ground theory, phenomenology and ethnography.

*Taylor's Handbook of Clinical Nursing Skills* Nov 28 2019 Taylor's Handbook of Clinical Nursing Skills is a step-by-step guide to basic and advanced nursing skills. This book will be a quick reference tool for review of cognitive and technical knowledge and will assist students and practicing nurses to provide safe and effective healthcare. It is an ideal companion to any nursing skills or nursing fundamentals text, including Lynn, Taylor's Clinical Nursing Skills and Taylor, Fundamentals of Nursing: The Art and Science of Nursing Care.

*Skill Checklists to Accompany Taylor's Clinical Nursing Skills* Jul 05 2020 This workbook allows students to practice and record the mastery of skills found in Taylor's Clinical Nursing Skills, Second Edition by providing checklists designed to record every step of each procedure. This set of checklists is valuable as a self-assessment tool for students and a means for faculty to record student performance.
