Life Cycle Assessment in the Agri-food Sector Jul 28 2019 The book presents an overview of the International practices and state-of-the-art of LCA studies in the agri-food sector, both in terms of adopted methodologies and application to particular products; the final purpose is to characterise and put order within the methodological issues connected to some important agri-food products (wine, olive oil, cereals and derived products, meat and fruit) and also defining practical guidelines for the implementation of LCAs in this particular sector. The first chapter entails an overview of the application of LCA to the food sector, the role of the different actors of the food supply chain and the methodological issues at a general level. The other chapters, each with a particular reference to the main foods of the five sectors under study, have a common structure which entails the review of LCA case studies of such agri-food products, the methodological issues, the ways with which they have been faced and the suggestion of practical guidelines.

Stickwork Sep 21 2021 Using minimal tools and a simple technique of bending, interweaving, and fastening together sticks, artist Patrick Dougherty creates works of art inseparable with nature and the landscape. With a dazzling variety of forms seamlessly intertwined with their context, his sculptures evoke fantastical images of nests, cocoons, cones, castles, and beehives. Over the last twenty-five years, Dougherty has built more than two hundred works throughout the United States, Europe, and Asia that range from stand-alone structures to a kind of modern primitive architecture--every piece mesmerizing in its ability to fly through trees, overtake buildings, and virtually defy gravity. *Stickwork*, Dougherty's first monograph, features thirty-eight of his organic, dynamic works that twist the line between architecture, landscape, and art. Constructed on-site using locally sourced materials and local volunteer labor, Dougherty's sculptures are tangles of twigs and branches that have been transformed into something unexpected and wild, elegant and artful, and often humorous. Sometimes freestanding, and other times wrapping around trees, buildings, railings, and rooms, they are constructed indoors and in nature. As organic matter, the stick sculptures eventually disintegrate and fade back into the landscape. Featuring a wealth of photographs and drawings documenting the construction process of each remarkable structure, *Stickwork* preserves the legend of the man who weaves the simplest of materials into a singular artistic triumph.
