[The Experiences of International Faculty in Institutions of Higher Education](#) Feb 22 2022 Responding to the growing need for recruitment and retention of international talent in higher education institutions globally, this volume documents the experiences and contribution of international graduate students, researchers, and faculty. This text foregrounds perspectives around recruitment, transition, integration, professional development, and the retention of scholars originating from, or arriving in, countries including China, Australia, Iraq, Japan, and the US. By investigating the support systems that are in place to assist foreign-born faculty members in institutes of higher education, the text provides important insights for departments and institutions as they look to successfully attract and retain global academic talent. Moreover, the scientific and practical implications of the research presented in the text directly informs institutional policy, working towards more effective, inclusive, and equitable ways to support international faculty. This text will benefit researchers, academics, and educators with an interest in higher education, international and comparative education, and, more specifically, those involved with faculty development programs. The text will also support further discussion and reflection around multicultural education, international teaching and learning, and educational policy more broadly.

[A History of American Higher Education](#) Dec 23 2021 This edition brings the discussion of perennial hot-button issues such as big-time sports programs up to date and addresses such current areas of contention as the changing role of governing boards and the financial challenges posed by the economic downturn.

[Reinventing Higher Education](#) Aug 19 2021 The inspiration for this timely book is the pressing need for fresh ideas and innovations in U.S. higher education. At the heart of the volume is the realization that higher education must evolve in fundamental ways if it is to respond to changing professional, economic, and technological circumstances, and if it is to successfully reach and prepare a vast population of students—traditional and nontraditional alike—for success in the coming decades. This collection of provocative articles by leading scholars, writers, innovators, and university administrators examines the current higher education environment and its chronic resistance to change; the rise of for-profit universities; the potential future role of community colleges in a significantly revised higher education realm; and the emergence of online learning as a means to reshape teaching and learning and to reach new consumers of higher education. Combining trenchant critiques of current conditions with thought-provoking analyses of possible reforms and new directions, *Reinventing Higher Education* is an ambitious exploration of possible future directions for revitalized American colleges and universities.

[The Undergraduate Experience](#) Oct 09 2020 A clear, practical framework for getting higher education back on track *The Undergraduate Experience* is a guide for significantly improving student learning and institutional performance in the rapidly changing world of higher education. Written by recognized experts in undergraduate education, this book encourages college and university leaders to rethink current practices that fragment the student experience, and to focus on creating powerful, integrated undergraduate learning for all students. Drawing from their own deep experience and the latest research, the authors reveal key principles that enable institutional change and enhance student outcomes in any higher education setting. Coverage includes high-impact practices for engagement, the importance of strategic leadership, the necessity of setting and maintaining high expectations, and insight on fostering excellence through systematic planning. Through its core themes and action principles, this book can be a valuable resource for faculty, staff, administrators, and governing boards at all types of postsecondary institutions. The book provides a practical framework for achieving excellence in undergraduate education by focusing on: Learning Relationships Expectations Alignment Improvement Leadership The value of an undergraduate education is under greater scrutiny than ever before, and campus leaders must be able to convey the value of their institutions to students, boards, donors, and legislators. Is a college or university degree worth the increasing cost? Are today's students academically adrift? What's the difference between a degree and an education? Responding to these questions requires focused action by individuals and institutions. *The Undergraduate Experience* offers practical guidance for creating and sustaining excellence in the face of disruption and change in higher education.

[Sustainable Development Goals and Institutions of Higher Education](#) Apr 26 2022 This volume brings together both theoretical and case study based contributions to the implementation of the Sustainable Development Goals (SDGs) in Institutions of Higher Education (IHE), presenting an impactful combination of authors from both developing and developed countries. While most current publications addressing the SDGs and education focus on sustainable development in general and specific topics such as climate change or energy, this book attempts to accelerate the localisation of the SDGs by presenting opportunities and innovations offered in various universities and campuses regarding SDGs localisation. The book seeks to provide an important contribution to the global dialogue on IHE and the SDGs, and will be of interest to academics and researchers engaged in the SDGs and education, as well as government agencies and other interested stakeholders. The book focuses on curriculum and learning matters, research and development as well as community engagement. Case studies detail the integration of SDGs in academic and professional development, new approaches to implementing sustainability science instruction, improvements in teaching practices to enhance teacher competence, and responsible management education. Additional focus is placed on the alignment of the SDGs in higher education with the other goals, emphasizing technological innovation for improved human health and environmental management, and climate change policies and action plans. Interdisciplinary solutions for pressing environmental problems are also provided, making sure that no one is left behind in realising these global development goals.

[American Higher Education](#) Oct 01 2022 Higher education in the United States is a complex, diverse, and important enterprise. The latest book in the *Core Concepts in Higher Education* series brings to life issues of governance, organization, teaching and learning, student life, faculty, finances, college sports, public policy, fundraising, and innovations in higher education today. Written by renowned author John R. Thelin, each chapter bridges research, theory, and practice and discusses a range of institutions—including the often overlooked for-profits, community colleges, and minority serving institutions. A blend of stories and analysis, this exciting new book challenges present and future higher education practitioners to be informed and active participants, capable of improving their institutions.

[Theorizing the Resilience of American Higher Education](#) Jan 12 2021 This book proposes a new theory of change in American higher education that explains the resilience of colleges and universities, and demonstrates how they adapt to new social and economic conditions. It argues that the demands for new educational missions, new sources of capital to finance innovation, and new organizational and governance models lead to the creation of institutional diversity. Using the theory of "accretive change" to predict future changes, this volume asserts that the rise of artificial intelligence and new investment models within the field of social entrepreneurship will shape the next wave of universities and educational institutions.

[Demographics and the Demand for Higher Education](#) May 04 2020 "The economics of American higher education are driven by one key factor--the availability of students willing to pay tuition--and many related factors that determine what schools they attend. By digging into the data, economist Nathan Grawe has created probability models for predicting college attendance. What he sees are alarming events on the horizon that every college and university needs to understand. Overall, he spots demographic patterns that are tilting the US population toward the Hispanic southwest. Moreover, since 2007, fertility rates have fallen by 12 percent. Higher education analysts recognize the destabilizing potential of these trends. However, existing work fails to adjust headcounts for college attendance probabilities and makes no systematic attempt to distinguish demand by institution type. This book analyzes demand forecasts by institution type and rank, disaggregating by demographic groups. Its findings often contradict the dominant narrative: while many schools face painful contractions, demand for elite schools is expected to grow by 15+ percent. Geographic and racial profiles will shift only slightly--and attendance by Asians, not Hispanics, will grow most. Grawe also use the model to consider possible changes in institutional recruitment strategies and government policies. These "what if" analyses show that even aggressive innovation is unlikely to overcome trends toward larger gaps across racial, family income, and parent education groups. Aimed at administrators and trustees with responsibility for decisions ranging from admissions to student support to tenure practices to facilities construction, this book offers data to inform decision-making--decisions that will determine institutional success in meeting demographic challenges"--

For-profit Higher Education Jul 18 2021 Today a college degree is needed to ensure an avenue to a decent standard of living. The workplace demands lifelong learning, since most workers will change careers several times before retiring. Meanwhile, attaining a degree is becoming more difficult both in terms of the time required and money. This affects not only individuals but encourages lawmakers to seek alternatives. This book examines higher education programs designed for and delivered to working adult students under a unique for-profit model, one that benefits both taxpayer and student.

Encyclopedia of International Higher Education Systems and Institutions Jul 30 2022 This authoritative reference source covers all higher education themes in a comprehensive, accessible and comparative way. It maps the field for the twenty first century reflecting the massive changes that have occurred and the challenges ahead for future research. It provides a rich diversity of scholarly perspectives and covers the entire spectrum of higher education from a geographical, a topical and disciplinary perspective. It is unrivaled in its capacity to go beyond national boundaries and provides indispensable comparative analyses. The major reference works available about higher education have been published more than two decades ago and since then higher education has undergone major changes that have resulted in a much larger, diverse, global, and multidimensional reality. One of the main trends has been relentless expansion on a worldwide scale. This has led to mass higher education becoming a reality across continents, substantial growth in the number of countries with universal access to higher education, and great diversification of the student body. The tremendous increase in the international links in higher education, through issues such as training, students' mobility, staff mobility, research activities, is another major change. The consequence is a global dimension that is strongly associated with the intensification of international networks in which institutions and researchers explore, create and share knowledge. As a result of the changes and trends, higher education has increasingly become part of debates that highlight its complexity as an institution that combines relevant political, social, economic, and cultural purposes and dimensions. Asked to play important and varied economic and social roles, higher education has had to reshape its priorities, and organizational and decision-making structures. The growth and increased complexity of the field have both led to more attention being paid to all aspects of higher education and to the expansion of research.

A Classification of Institutions of Higher Education Aug 31 2022 This new edition of the Carnegie Classification of Higher Education groups American colleges and universities according to their missions and similarity of their programs and purposes. In this 1994 edition, for the first time, institutions are classified according to the highest level of degree conferred, and a new category is introduced--tribal colleges and universities. A foreword by Ernest L. Boyer reveals trends in higher education as indicated by changes in the classification. Preliminary figures and tables offer data on percentage of institutions within each classification area, enrollment by type of institution, and changes in enrollment over time. Part I then lists public and private institutions by state within the following classification areas: research universities (levels I and II); doctoral universities (levels I and II); master's (comprehensive) colleges and universities (levels I and II); baccalaureate (liberal arts) colleges I; baccalaureate colleges II; associate of arts colleges; and specialized institutions (religion and theology, medical, other health professions, engineering and technology, business and management, art, music, design, law, teachers colleges, and tribal colleges and universities). An index lists institutions alphabetically, along with their respective classifications. (JDD)

Budgets and Financial Management in Higher Education Dec 31 2019 This book will help new administrators (department chairs, directors, deans) understand and become more proficient in their financial management role within the institution. Highly accessible, practitioners will be able to put the book's guidance to immediate use in their work. It is also grounded in the latest knowledge base and filled with examples from across all types of institutions, so that it makes an ideal text for a courses in graduate programs in higher education leadership and administration. Specifically, the book: • provides an understanding of the basics of budgeting and fiscal management in higher education • defines the elements of a budget, the budget cycle, and the steps for creating a budget • suggests ways of avoiding common pitfalls and problems of managing budgets • contains effective strategies for dealing with loss of resources • includes end-of-chapter reflection questions and an expanded glossary of terms Written in plain language this volume provides practical approaches to many complex problems in fiscal management. This new edition of the book contains new information in every chapter reflecting both the most recent developments in higher education and feedback from readers of the earlier edition. The information on the current higher education financial environment has been updated, and the case studies have been revised. Readers will be introduced to Bowen's theory of resources and expenses as an important way to understand budgetary decision making in colleges and universities. Special attention is paid to the use of restricted funds, the budget implications of faculty appointments and the challenges caused by personnel policies for staff. In addition, greater attention is given to development and implementation of repair and replacement programs in auxiliary enterprises. The challenges that arise when budget problems are postponed are also discussed. The volume contains a number of suggestions for practitioners with new budgeting and fiscal responsibilities.

Structuring Mass Higher Education Jan 30 2020 Structuring Mass Higher Education defines and highlights what makes an 'elite' university - something which institutions must strive for in order to gain their position as global players.

The Christian College Phenomenon Sep 19 2021 A book that looks at why and how Christian Colleges are growing at such a fast pace compared to other college experiences.

The Research Mission of Higher Education Institutions outside the University Sector Jun 04 2020 Even if in most countries non-university higher education institutions did not have originally a research mandate, it is well known that in most cases these institutions have progressively developed research activities and, at least in some countries, the State now has recognized the research role of these institutions and provided support and funding. Moreover, in many countries the role of research in polytechnics, 'fachhochschulen', 'hogescholen', university colleges, etc is on the political agenda. Despite the importance of the issue, there are very few in-depth studies of research in the non-university sector. These studies show that the development of research in these institutions leads to quite complex interactions with universities, both in the sense of convergence (academic drift) and/or of differentiation of a specific research mandate oriented towards the regional economy. Therefore, this book aims to fill this gap by first analysing a number of transversal issues related to the research mission of these institutions. In its second part it gives an overview of the state of the art in eight European countries.

Higher Education in Transition Jan 24 2022 At a time when our colleges and universities face momentous questions of new growth and direction, the republication of *Higher Education in Transition* is more timely than ever. Beginning with colonial times, the authors trace the development of our college and university system chronologically, in terms of men and institutions. They bring into focus such major areas of concern as curriculum, administration, academic freedom, and student life. They tell their story with a sharp eye for the human values at stake and the issues that will be with us in the future. One gets a sense not only of temporal sequence by centuries and decades but also of unity and continuity by a review of major themes and topics. Rudy's new chapters update developments in higher education during the last twenty years. *Higher Education in Transition* continues to have significance not only for those who work in higher education, but for everyone interested in American ideas, traditions, and social and intellectual history.

Directory of Institutions of Higher Learning in Michigan Apr 14 2021

International Handbook of Universities and Other Institutions of Higher Education Nov 09 2020

Handbook of Research on Enhancing Innovation in Higher Education Institutions Mar 02 2020 Innovation in higher education is a process of institutional adaptation to changes in the environment that enables higher education institutions to improve their existing practice and to be innovative at different levels and in different forms. Moreover, innovativeness is also related to internal characteristics of higher education institutions. Innovation in higher education can be observed as a result of the changing contexts in which higher education institutions function. Adjacently, a comprehensive approach to considering innovativeness is needed in order to enable the examination of different elements of innovativeness in higher education, that is, to identify the key factors that (de)stimulate innovations and affect their interactions with other relevant stakeholders at the national level and beyond. The *Handbook of Research on Enhancing Innovation in Higher Education Institutions* is a critical scholarly book that examines innovativeness in higher education and its complications and diversity. Starting from the view that higher education is currently confronted by global forces that require new research ideas, the publication suggests that comprehensive understanding of innovativeness is imperative for higher education's institutions in the 21st century. Analyzing the recognized trends within the publication and concluding which aspects should be taken to improve innovativeness in higher education, this reference book outlines quality and innovation in teaching, innovative university-business cooperation, institutional framework and governance of higher education institutions, knowledge management, and leadership and organizational culture. It is ideal for curriculum designers, administrators, researchers, policymakers, academicians, professionals, and students.

Successful Global Collaborations in Higher Education Institutions Dec 11 2020 This open access book presents deep investigation to the manifold topics pertaining to global university collaboration. It outlines the strategies King Abdulaziz University has employed to rise in global rankings, and the reasons chosen to collaborate with other academic and research institutes. The environment in which universities currently exist is considered, and subsequently how an innovative culture might be established and maintained to enable global partnerships to be implemented and to succeed is discussed. The book provides an intense focus on why collaboration is a necessary ingredient for knowledge transfer and explains how to do it. The last part of the book considers how to sustain partnerships. This is because one of the challenges of global partnerships is not just setting them up, but also sustaining them.

Responsibility of Higher Education Systems Sep 07 2020 This book contributes to the understanding of the responsibilities of Higher Education in the evolving societal, political and economic landscape. It raises questions about its role in society, its responsibility towards students and staff, and its intended impact.
